

CENTRAL INTELLIGENCE AGENCY

OFFICE OF CENTRAL REFERENCE

7 January 1963

MEMORANDUM FOR: Deputy Director (Intelligence)

SUBJECT: [REDACTED] Intelligence

25X1B

25X1B

1. This action memorandum recommends (in paras. 10-13) a reallocation of responsibility for producing and disseminating certain [REDACTED] intelligence.

BACKGROUND

25X1B

2. The present major medium for regularly scheduled production and dissemination of comprehensive [REDACTED] intelligence is the National Intelligence Survey (NIS). Since the production of the first collection in January 1950 on Egypt, over [REDACTED] have been produced, covering [REDACTED] in 78 different countries. For about six years these reports covered [REDACTED] only and were published as [REDACTED] of the NIS. After that the coverage was broadened to include [REDACTED]

25X1B

25X1B

25X1B

[REDACTED] Production of [REDACTED] was discontinued in 1955. The new publication was titled [REDACTED] and included contributions from five different agencies coordinated by the Department of State. In mid-1961 responsibility for production [REDACTED] was transferred from State [REDACTED] (as part of the transfer of State's entire responsibility for producing [REDACTED] Responsibility for coordinating the production [REDACTED] remained in OBI.

25X1B

25X1B

3. For the 13 years since January 1950 the number [REDACTED] produced per year averaged about 460. During the last few years State augmented its production, aiming at 1800 to 2000 [REDACTED] per year. State succeeded in producing 790 in FY 1960 and 765 in FY 1961. The number [REDACTED] in each volume has varied considerably. Ten have 20 or less, whereas the U.S.S.R. and Communist China have 775 and 765 respectively. The arithmetical average number [REDACTED] contained is 14, while the median is 44. [REDACTED] varied in length from 1/2 to 8 manuscript pages.

4. [redacted] now produces these [redacted] reports, expending an estimated 15% of its production effort in support thereof. The major portion of this effort is devoted to the preparation of the reports themselves, prefaces, glossaries and indexes. In addition, [redacted] also produces [redacted] for Chapter I (Brief) and [redacted] for the various sections in Chapter VII (Scientific). Final decision regarding scheduling, length, and editing remains with OBI after consultation [redacted]. Presently scheduled and forecast coverage of [redacted] includes seven loose-leaf publications to which the Pentagon services contribute. OBI collaborates in the selection of [redacted]. The other publications, scheduled and forecast at the rate of about 16 per year, including revisions to the loose-leaf publications, are produced solely by [redacted].

DISCUSSION

25X1B

25X1B

5. Since the responsibility for the preparation of [redacted] intelligence [redacted] now rests solely in [redacted] there is less need for the role played by OBI as coordinator of interdepartmental efforts [redacted]. It would thus appear timely to consider what advantages could result from a change making [redacted] the responsible production office.

25X1A

25X1B

25X1A

25X1B

6. Three potential advantages are significant: (a) a decrease in the time lags between the production of [redacted] and its availability as a printed report to an interested recipient (now regularly ranging from 6 to 12 months); (b) a greater facility in updating reports once issued; and (c) greater flexibility in scheduling [redacted] production.

25X1A

25X1A

7. [redacted] can commit itself to a level of production under a revised program at least equivalent to its present support to the MIS program.

25X1B

8. In our view, a scheduled [redacted] publication program should be continued. The many government components, especially those overseas, have a continuing need for this type of information. Many cases arise where regularly scheduled production can serve to anticipate field requirements or provide an immediate [redacted] response to such requirements. MIS requirements can be better met by selectively including brief [redacted] in related material as is now done in the [redacted].

9. The dimensions of a revised [REDACTED] program should be determined by a study of the requirements to which such a program should be responsive. Thus, we should not at this time prescribe the program's scope and content. (Note: The study effort can moreover be carried out concurrently with [REDACTED] program to stimulate and guide [REDACTED] reporting by Foreign Service posts.)

RECOMMENDATIONS:

10. That no further [REDACTED] sections be planned by NIS.

11. That [REDACTED] assume responsibility for providing scheduled [REDACTED] reports to components of the Government previously relying on NIS. However, [REDACTED] coverage included in [REDACTED] and such other [REDACTED] inputs as for the Chapter I (General Surveys), shall continue to be responsive to NIS requirements.

12. That this proposal be referred to the NIS Committee for concurrence and forwarding for USIB consideration.

13. That, as a first step following USIB approval, [REDACTED] conduct a study of requirements for this type of coverage to determine the dimensions of a responsive production program, which program [REDACTED] shall then implement within its capabilities.
